

Metal Magic

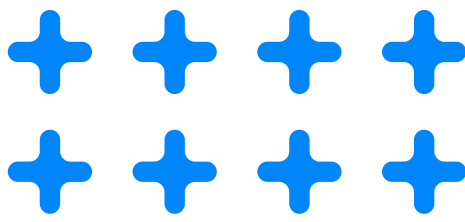

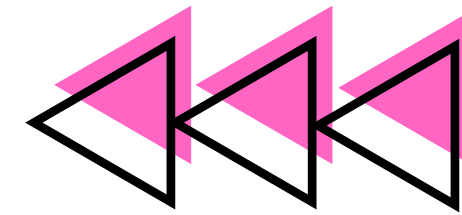

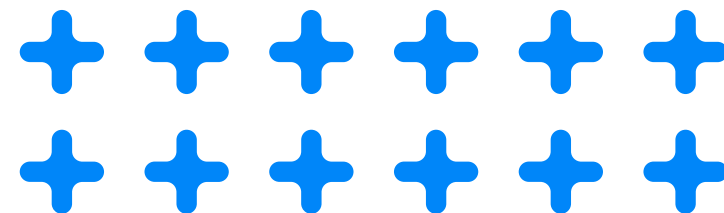

# How To Create an

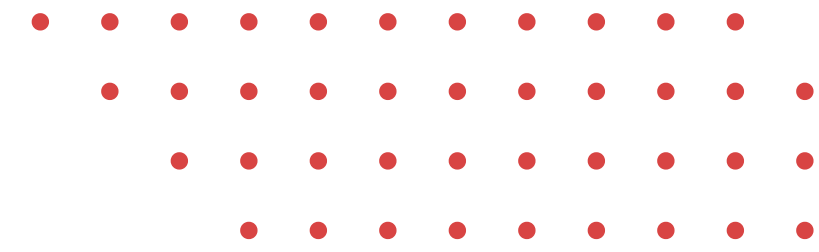

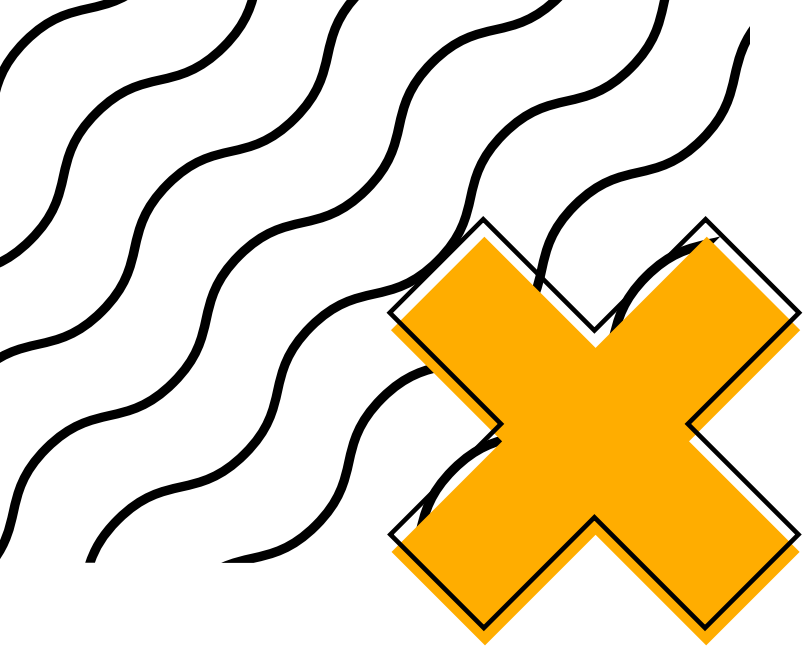

# MVP Pitch

# What is an MVP?

- MVP = Minimal Viable Product
- Basic version of your code that actually works
- Focuses on solving one problem
- Your goal is to prove the idea works

# Keep in mind:

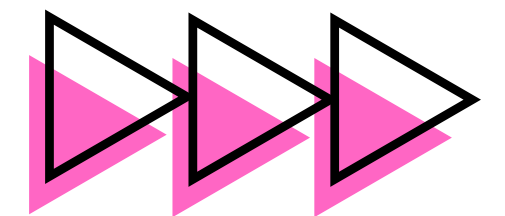

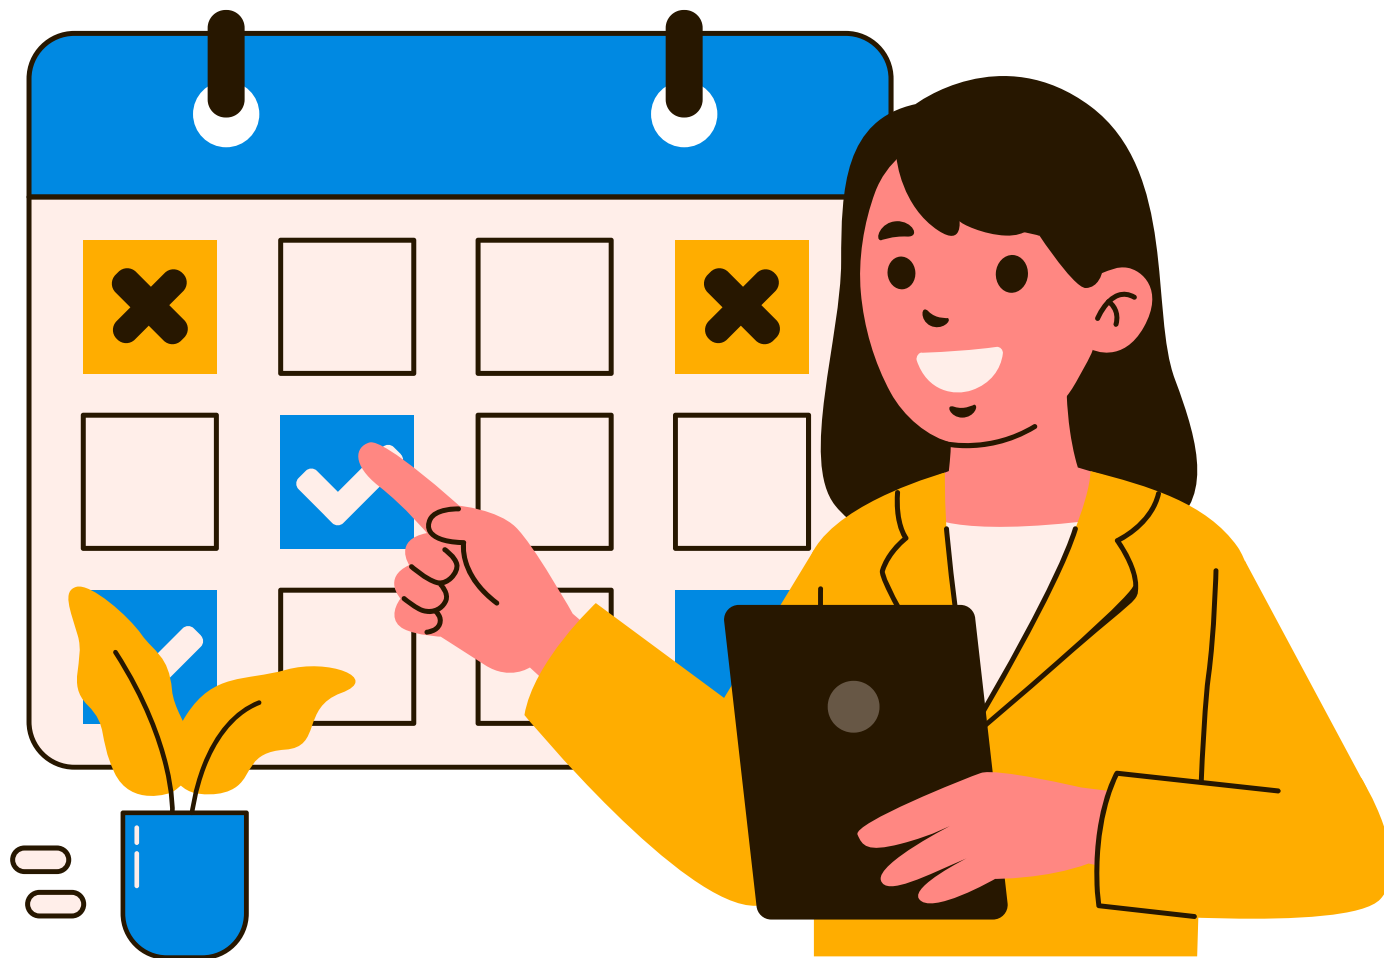

Clear problem + Creative Solution

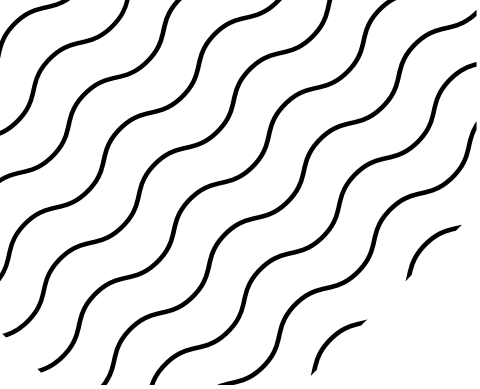

Working demo

Easy to understand explanation

Confidence and teamwork

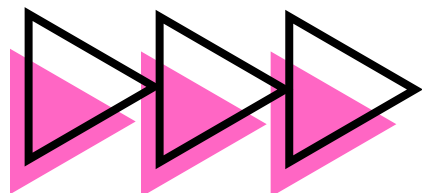

Captures attention (Entertaining?)

# Pitch structure

- Hook
- Problem
- Solution
- UVP
- Demo

# Hook

Keep it short 15-20s

Grab your audience's attention

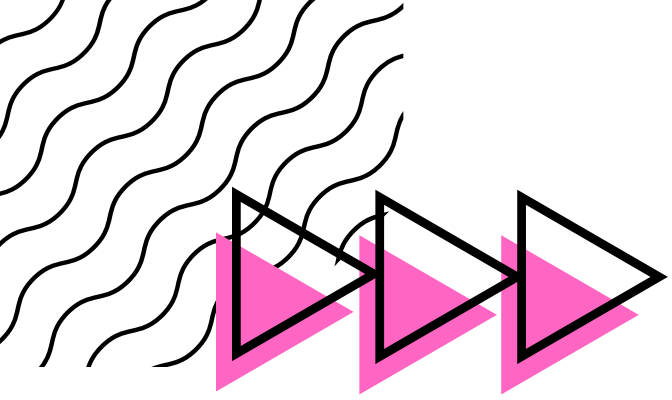

Open with a surprising fact or claim

Relatable moment or problem

Example: "125,000 seniors in the US die every year because they forgot to take their medicine."

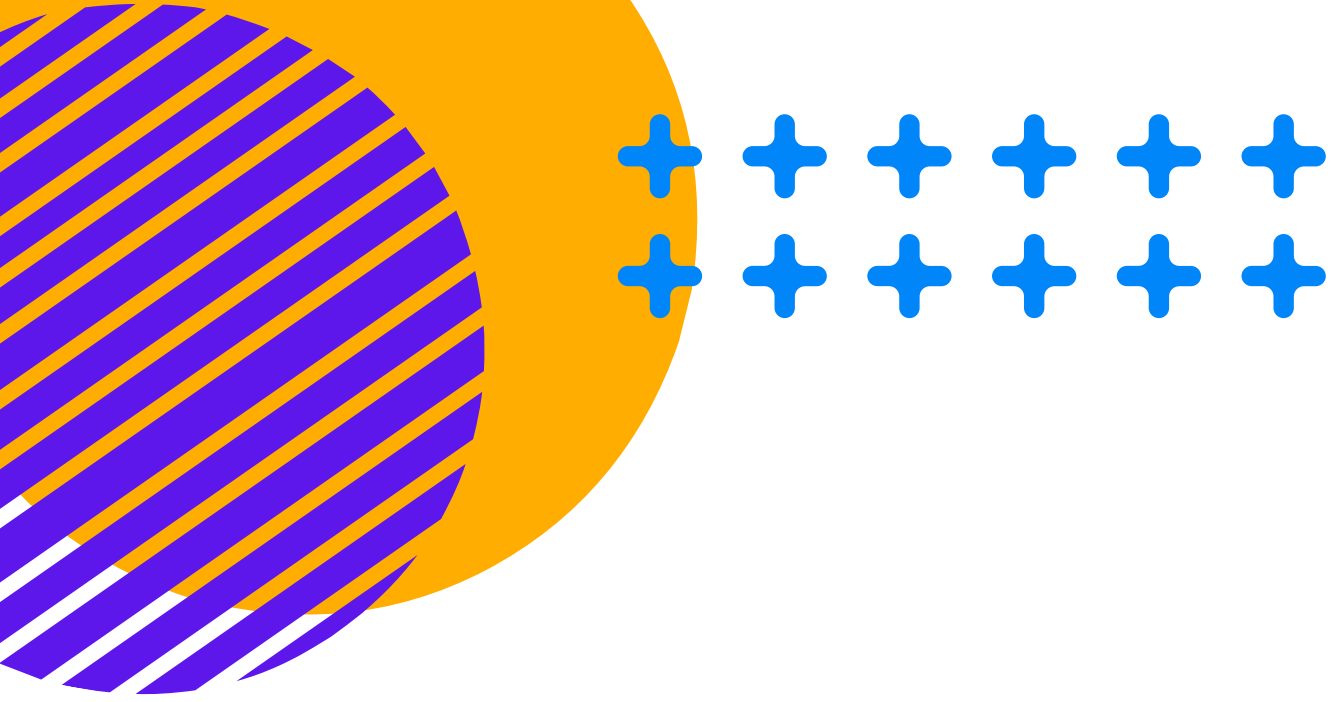

# Problem

- What problem exists?
- Who experiences it?
- Why does it matter?
- Example: “Seniors living alone struggle to remember their medication schedules and with no one around to remind them, wrong doses send thousands to the ER every year.”

# Solution

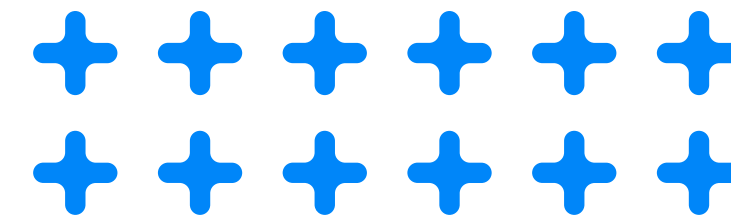

Describe your product/service simply

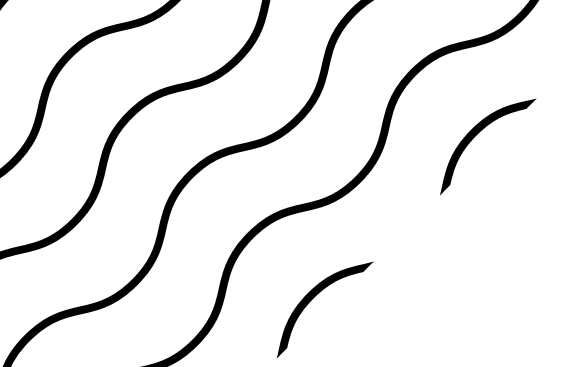

Avoid jargon

Pick 1-2 best features

Connect back to problem

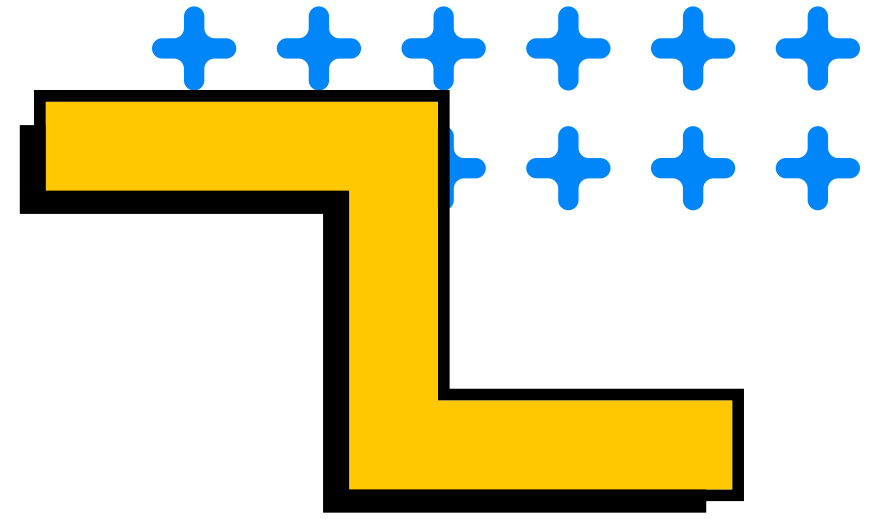

Example: “MedBot is a robot that knows your medication schedule and reminds you at the right time so no dose is skipped.”

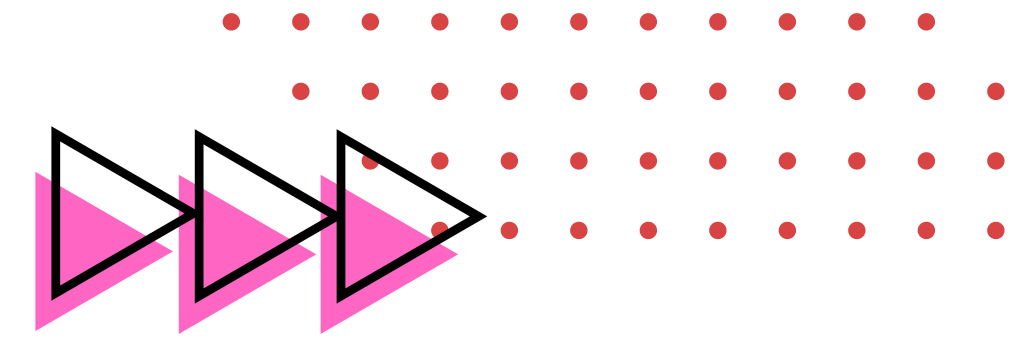

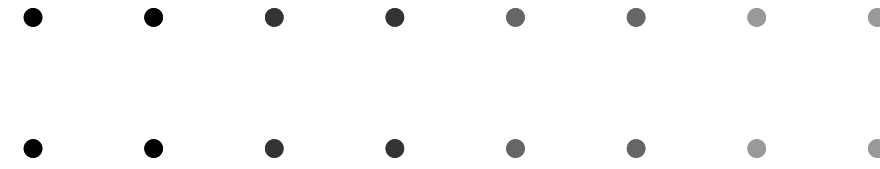

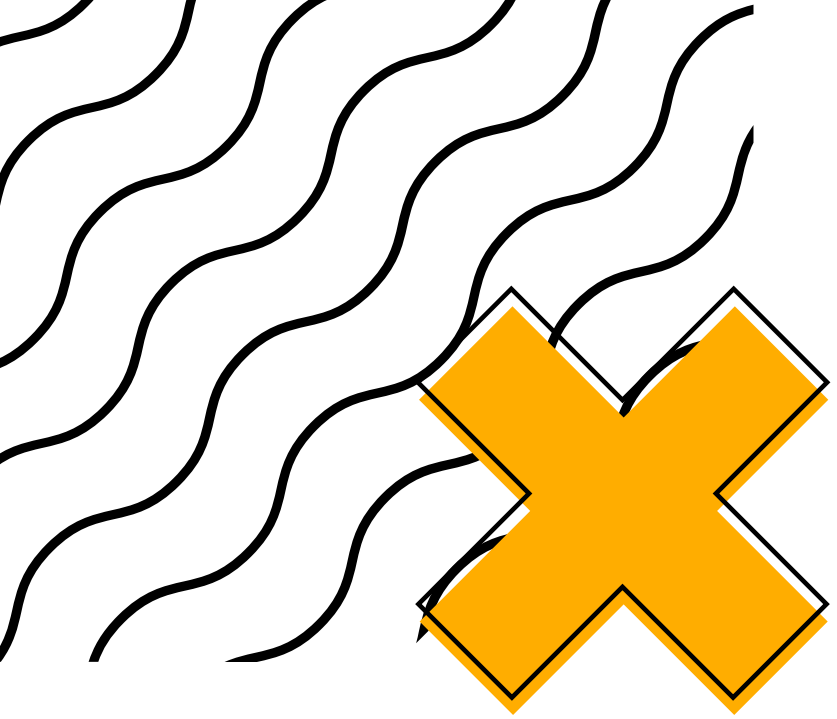

# UVP

- What makes your project different?
- Why would people use it?
- What value does it provide?
- Example: “Unlike regular pill organizers that just sit on your counter, MedBot actively reminds you when to take your medicine.”

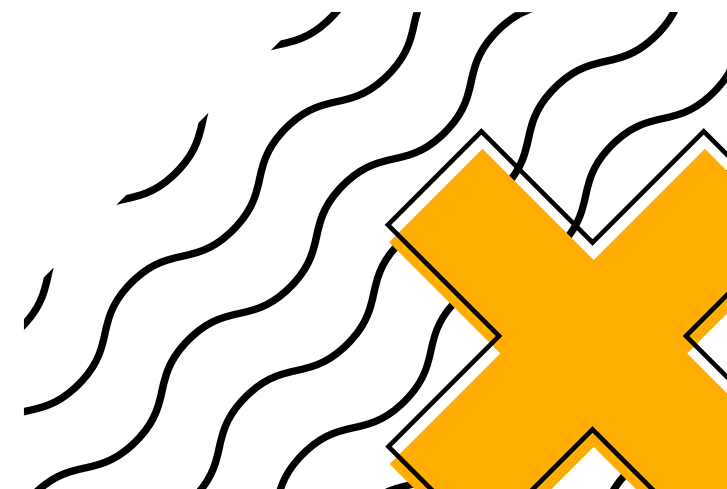

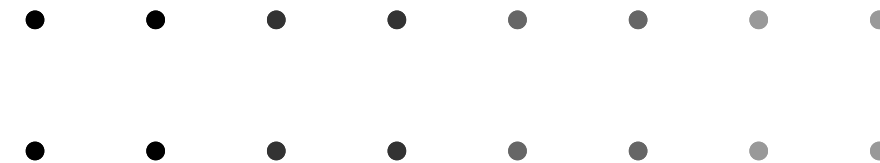

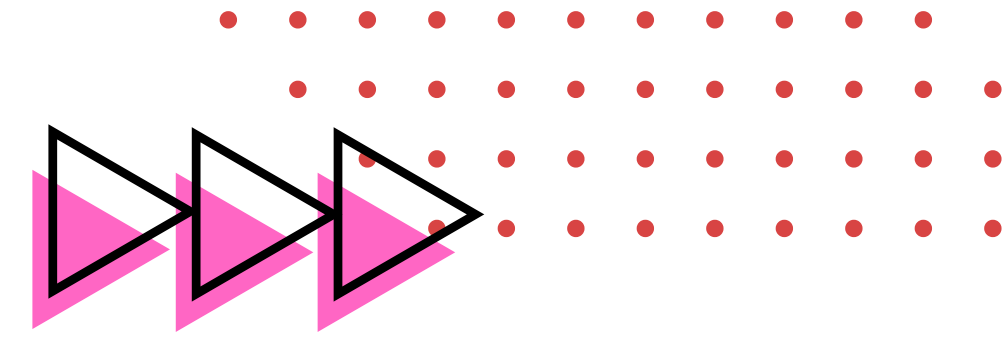

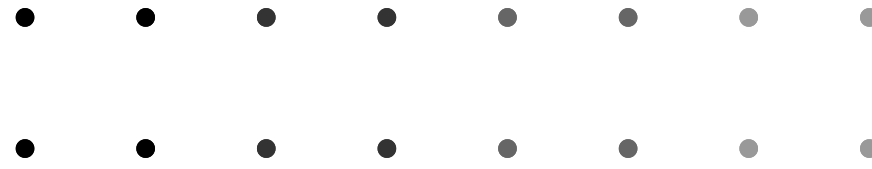

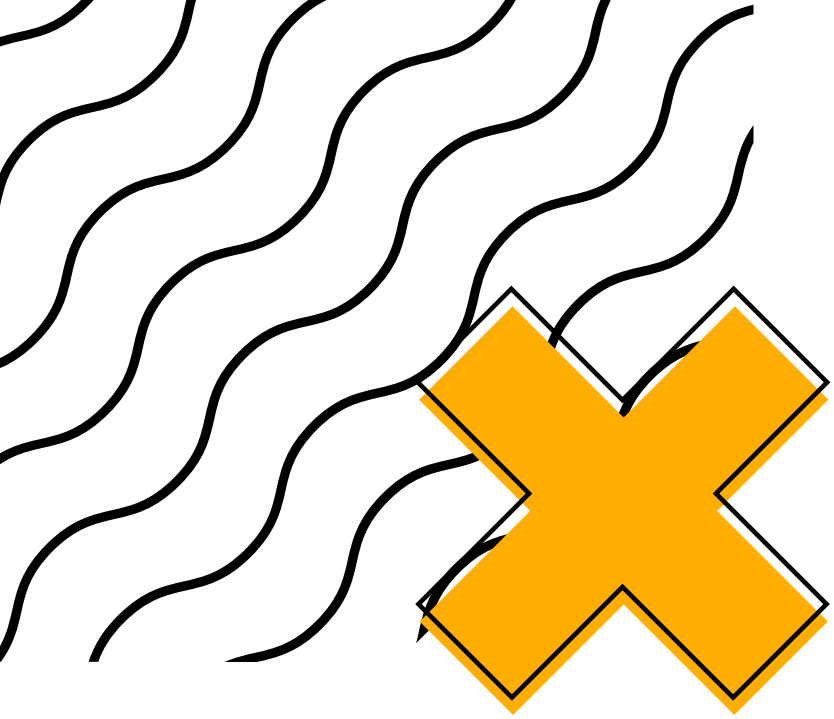

# Tips and advice

Show passion for your idea

Practice before recording

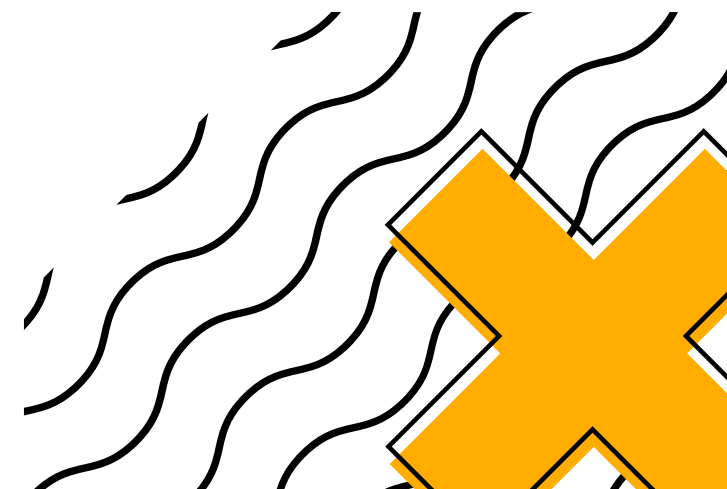

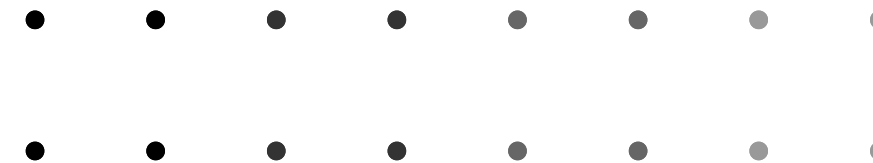

Keep the audience engaged
